

How to be Successful in Math 11

General Approach

- **Care** – this is about you, your future and nobody else's
- **Listen** - carefully when instructions/lessons are being given
- **Practice** – work hard to complete every question assigned (practice makes permanent)
- **Complete** - all assignments and submit when due (do not get behind)
- **Prepare** - for quizzes/tests
- **Know** - the class website and what it offers
- **Check** - My Ed BC regularly for marks.

Physical Preparation to Learn (stuff you need)

- **Binder** - stay Organized (Use a binder designed to accept 3-hole punched paper)
- **Pencil** - always have/use pencils (pens aren't recommended)
- **Eraser** – everyone makes mistakes
- **Calculator** - to be used when permitted; must be 'scientific'
- **Text/Workbook** – do not lose and bring to EVERY class
- **Eliminate Distraction** - electronics, friends and focus on the task at hand
